

Gy6.35 11x44 mm 12V 28W clear eco halogen

Halogen lamps are energy-efficient alternatives to incandescent bulbs. Additionally, this series of lamps has some specific shapes and connections that are not possible in incandescent bulbs. The halogen gas used in them provides higher lumens per watt than an incandescent bulb. The eco series in this line is the latest generation of halogen lamps that operate even more energy-efficiently than the regular halogen lamps.
